

NATIONAL TYPE EVALUATION PROGRAM

Certificate of Conformance for Weighing and Measuring Devices

For:

Computing Scale

Weighing/Load Receiving Element, Digital Electronic

Model: CL 5000 Series and CL 5500 Series

n_{max}: 3000

e_{min}: see table on page 2

Capacity x d: see table on page 2

Platform Size: B, R, $P - 11 \frac{3}{4}$ in x 15 $\frac{3}{4}$ in

 $H - 11 \frac{1}{2} \text{ in x } 17 \frac{1}{8} \text{ in}$

Accuracy Class: III

Submitted By:

Standard Features and Options

See table on page 2 for specific model features and options.

Standard Features:

- Semi-automatic (push-button) Zero
- Automatic Zero Setting Mechanism (AZSM)
- Initial Zero Setting Mechanism (IZSM)
- Alphanumeric Display
- Liquid Crystal Display (LCD)
- Gross/Net Weight Display
- Customer Display
- AC Power Supply
- Programmable Tare
- Tare Save Key
- RS-232 and Print Capability
- lb/kg Conversion
- Multi-interval

Load Cells Used:

- CAS Corp., Model No. TPN-15L, Capacity 15 kg, v_{min} 0.005 kg
- \bullet CAS Corp., Model No. TPN-30L, Capacity 30 kg, v_{min} 0.01 kg

Temperature Range: -10 °C to 40 °C (14 °F to 104 °F)

This device was evaluated under the National Type Evaluation Program and was found to comply with the applicable technical requirements of "NIST Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices." Evaluation results and device characteristics necessary for inspection and use in commerce are on the following pages.

^{*} Model Submitted for Evaluation

B = Built-in Display

P = Linear Display on a Pole

R = High Legibility, Vertical Display on a Pole

RP = Remote Platter

H = Hanging Scale

Application: The CL5000 is for use in direct sales, price computing, or general purpose weighing.

<u>Identification</u>: <u>CL5000H</u>: The required markings are located on a plate riveted to the top right of the scale housing indicator. <u>CL5000/B</u>, <u>P</u>, and <u>R</u>: The required markings are located on a plate riveted to the back of the scale. <u>RP</u>: The required markings are located on a metal plate under the platform.

Additionally, other markings depicting capacities, preset tares, unit price, and total price are visible near the operator and customer display windows

<u>Sealing</u>: <u>CL5000H</u>: Sealing is provided by a wire seal threaded through two brass screw heads under the plastic cover which secure a cover plate preventing access to the calibration switch located below the customer display. <u>CL5000B</u>, <u>P</u>, <u>R</u>, and <u>RP</u>: Sealing is provided by a wire seal threaded through two brass screw heads under the platter, which secure a cover plate preventing access to the calibration switch.

<u>Test Conditions</u>: This certificate supersedes Certificate of Conformance 07-042A3 to add the CL 5500 Series. Three units were submitted for this evaluation: a CL 5500/B (15/30 lb x0.005/0.01 lb), a CL 5500/P (30/60 lb x 0.01/0.02 lb), and a CL 5500/H (15/30 lb x 0.05/0.01 lb). Several increasing/decreasing load, shift and discrimination tests were conducted as well as price computation, indication and registration functions, zero setting mechanism and tare functions verification. Previous test results are listed below for reference.

<u>Certificate of Conformance Number 07-042A3</u>: This certificate supersedes Certificate of Conformance 07-042A2 to add ounces (oz) to the list of units of measure for the model CL5000/B. A model CL5000/B (250/500 oz x 0.1/0.2 oz) was submitted for this evaluation. Several increasing/decreasing load, shift, and discrimination tests were conducted as well as price computation verification.

Certificate of Conformance Number 07-042A2: This certificate supersedes Certificate of Conformance 07-042A1 to add a hanging version of the CL5000. The Model CL 5000/H (15/30 lb x 0.005/0.01 lb) was submitted and evaluated in the Division of Measurement Standards lab at Sacramento, CA. The emphasis of this evaluation was on device design, operation, performance, marking requirements, and compliance with influence factor requirements. Several increasing/decreasing load and shift tests were conducted. The device was tested over a temperature range of -10°C to 40°C (14°F to 104°F). A load of approximately one-half capacity was

CAS Corporation

Computing Scale / CL 5000 Series & CL 5500 Series

applied to the scale more than 100 000 times. The scale was tested for accuracy approximately every 25 000 times. Additionally, tests were conducted using 100 VAC and 130 VAC.

<u>Certificate of Conformance Number 07-042A1</u>: This certificate supersedes Certificate of Conformance 07-042 and is issued to add remote platform capabilities. The emphasis of this evaluation was on the device design, marking requirements, and compliance with influence factor requirements. When connected, this platform deactivates the internal platform. A model CL5000RP (0-15kg x 0.005kg/15-30kg x 0.01kg, 0-30lb x 0.01lb/ 30-60lb x 0.02lb) was submitted for evaluation and several increasing /decreasing load and shift tests were conducted. The scale was tested over a temperature range of -10°C to 40°C (14°F to 104°F).

<u>Certificate of Conformance Number 07-042</u>: The Model CL 5000/B (15/30 lb x 0.005/0.01 lb) was submitted for evaluation. The emphasis of this evaluation was on device design, operation, performance, marking requirements, and compliance with influence factor requirements. Several increasing/decreasing load and shift tests were conducted. The device was tested over a temperature range of -10°C to 40°C (14°F to 104°F). A load of approximately one-half capacity was applied to the scale more than 100 000 times. The scale was tested for accuracy approximately every 25 000 times. Additionally, tests were conducted using 100 VAC and 130 VAC.

Evaluated By: S. Boyd (CA) 07-042; E.A. Payne, Jr. (MD) 07-042A1; S. Munoz (CA) 07-042A3; E. Morabito (NY) 07-042A3, 07-042A4

<u>Type Evaluation Criteria Used:</u> NIST, <u>Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices, 2018. NCWM, Publication 14: Weighing Devices, 2018.</u>

<u>Conclusion</u>: The results of the evaluation and information provided by the manufacturer indicate the device complies with applicable requirements.
